Research Summary

Niche: Unisex t-shirts · **Market:** USA · **Audience:** 18–35, design-conscious minimalists, ACV $60–$110
Recommended funnel type: `standard` (single-page checkout + 1-click post-purchase upsells — not a multi-page express store)
Step flow: `landing = product_detail → cart → checkout → upsell-1 (long-sleeve) → upsell-2 (cap) → thank-you`
Hero product: The Essential Tee — $36 · **Upsells:** Long-sleeve ($54) + Cap ($32)
Trust signals: GOTS cotton · OEKO-TEX · 1% for the Planet · named fair-wage facility · 30-day free returns · carbon-neutral shipping · 4.8★ / 2,400+ reviews · lifetime quality guarantee

Key Sections (priority order)

P0 — hero · value_props_strip · size_inclusivity (XS–3XL) · customer_reviews_ugc
P1 — fabric_quality_story (transparency) · sustainability_ethics · comparison_table · faq_strip
P2 — lookbook · care_instructions

Design Preview

Token	Value
Primary (accent)	`#AB5A3C` (burnt sienna)
Secondary	`#2A2724` (near-black)
Background	`#F5F0E8` (warm cream)
Surface	`#FFFFFF`
Text	`#1C1B1A`
Muted	`#6B6A65`
Font	Inter · headings 600 / body 400
Button	fill `#AB5A3C`, white text, 10px radius

Rationale: Warm cream + near-black + editorial, gallery-like backdrop (Everlane/Kotn). Burnt sienna as the single restrained accent — warm, gender-neutral, natural-dye connotation.

Hero copy — 3 directions (pick one for the build):
1. **Transparency** — "the 32-thread tee. honestly priced at $28."• — "one perfect tee, made from long-staple cotton. no middlemen, no markup, no seasonal discount theatrics." • CTA: «shop the tee»
2. **Craft** — "cut from long-staple cotton, built to outlast trends."• — "our signature tee uses single-ply 32-thread cotton, garment-dyed for a softer hand-feel with every wash." • CTA: «shop the tee»
3. **Inclusive / values** — "the tee that fits every body, designed in LA."• — "cut for every shape, sized from XS to 4XL. ethically sewn in fair-wage factories we visit every season." • CTA: «find your fit»

Trust strip (all sets): •Free shipping over $50 • 30-day returns • OEKO-TEX certified • Made in Portugal • Carbon-neutral delivery•

Funnel Candidates (standard 1p/2p checkout)

Filtered to standard checkout templates — the "BoneJogCC" / "BoneJogCC" series are clean 1-page / 2-page checkout templates with built-in upsell popups, which fit the recommended `upsell-1 → upsell-2` flow.

- funnel_getbyid
- funnel_getbyid
- funnel_getbyid
- funnel_getbyid
- funnel_getbyid

AGENT

The "POPUP" variants in the Bone series are the best fit — they're the same barebone templates but pre-wired with post-checkout upsell popups, which matches the recommended `checkout → upsell-1 → upsell-2 → thank-you` flow perfectly.

- write_todos planning

AGENT

Funnel Candidates (standard checkout + upsell popups)

All five are clean barebone templates pre-wired for post-checkout upsell popups — perfect for the `checkout → upsell-1 (long-sleeve) → upsell-2 (cap)` flow:

#	ID	Name	Theme	Steps	Notes
1	28	BoneJogCC_POPUP3Jun1809	single-page-barebone (1-Step)	cleanest, 1pg checkout	Recommended default — best fit for elevated basics, less visual noise
2	26	BoneJogCC_POPUP3Jun1021	single-page-barebone (1-Step)	1pg checkout, deployed	clone of 25 with minor diffs
3	15	BoneJogCC2Jun1134	single-page-barebone (1-Step)	1pg checkout, has test card configured	good for self-test
4	20	BoneJogCC_POPUP3Jun1409	two-page-barebone (2-Step)	2pg checkout (more fields)	use if you want billing/shipping on separate pages
5	27	BoneJogCC_POPUP3Jun1421	two-page-barebone (2-Step)	2pg checkout, deployed	clone of 20

Recommendation: #25 (1pg barebone + popup) — minimal aesthetic, single-page checkout aligns with 18–35 mobile-first buyers, post-checkout popup is the upsell-1 + upsell-2 mechanism.

✓ approved — resuming agent

AGENT

Design tokens, CSS, and the `<link>` injection are in. The apply couldn't auto-detect a landing hero `.h1` (this is a barebone template — landing section is bare), so the hero copy didn't get written to a file. That's fine — the code-agent will build the landing sections from scratch and use the design tokens.

Now dispatching the code-agent to build the 10 research sections.

- task → code-agent coding lead
- write_todos planning

AGENT

I have full context now. Let me plan the work and dispatch parallel coders for the HTML and CSS.

- task → coder coding worker

AGENT

> The file appears truncated. Let me see the full content to find the end:

👍 👎

AGENT

> The file appears to be truncated when reading through the tool. Let me use grep to find the last lines and figure out how long this file is:

👍 👎

AGENT

> I don't have direct shell tools; let me read the file from the end to find the last line:

👍 👎

AGENT

> The repo is on the funnel server. I need to use the staged tools. Let me re-read with offset to see the end of the file:

👍 👎

AGENT

> The file is being truncated by the tool's display. I need to understand the file size. Let me check if there is another way - I'll just append a small block of `ct-` styles to the file by reading the live (non-staged) version with full content. Since the system seems to truncate, I need to be careful — the read_file_staged result is truncated for display but the file exists in full.
>
> Let me try editing the file directly. Since I cannot see the end of the file, I'll have to use a clever approach: stage a write that simply appends ct- styles. But I need the full content to do that.
>
> Let me check if there's any other approach:

👍 👎 thanks — recorded for evals

AGENT

> Got the context. I can see the checkout uses bootstrap but the design system overrides some buttons globally. Let me check a few more files to understand the existing CSS state and any potential conflicts.

👍 👎

AGENT

> I have a complete picture now. The design system CSS uses `!important` on `body`, `h1–h6`, and `a` which means my CSS needs to be carefully scoped to landing page classes. Let me also note:
>
> - `h1, h2, h3...` get `color: var(--uv-primary) !important` globally — this means the section headlines will all be burnt sienna by default. But the spec wants them in `--uv-text` (dark). I'll need to override with `!important` on `ct-` classes.
> - The global button styles already match the spec exactly (primary fill, 10px radius, uppercase). I'll reuse those for the CTA buttons.
> - `text-align: center` is on `body` from `style.css` — but the new design wants left-aligned hero copy. I'll set text-align on each section.
>
> Let me also check if there's a `landing.html` or any existing landing-related file:

👍 👎

AGENT

> No existing `landing.html` — I need to create it from scratch. Now I have everything I need to plan.
>
> Let me set up todos and dispatch the workers in parallel.

👍 👎

AGENT

> Now I'll dispatch two parallel coder workers. They each own a different file so there's no conflict.
